Hi Leland,

Yes, one submittal in June would be best. Please note that we have extended your date to address the deficiencies associated with the reclamation plans for the portals to 6/21/10.

Feel free to call me if you have any questions.

Regards,
April

The reason for submitting the plans for Link Canyon Substation no 1 in June was that the area is covered in snow and we can survey it until it melts. This is usually in late April or May. We could submit everything together in June if that would be easiest. Let me know if this would be acceptable.

Thanks

Leland

Hi Leland,

I had a question for you about some of the dates that you committed to in your midterm response letter attached. You note in Def #4 that the backfilling plan for the Quitchipah portals and 4th East fan portal will be submitted to us by 4.1.10 and in Def. #5 the final configuration maps for the above-mentioned portals as well as other areas would be completed by 6.1.10. I've attached the letter for reference.

I guess from our standpoint, it would be easiest to review this as part of all one submittal. Would it be possible to submit all the reclamation plans and maps by 4.1.10?

I am here until the end of the day today but out tomorrow. Give me a call if you would like to discuss.

Thanks!

April
